# JOHN DEERE

## ENGINE PERFORMANCE CURVE

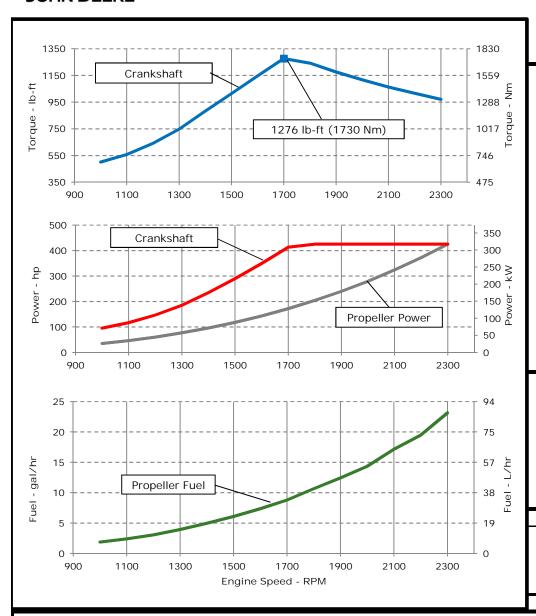

PowerTech<sup>TM</sup> 9.0L Engine

Model: 6090SFM85

Rating: M3 - 425hp (317kW) @ 2300 RPM

Application: Marine

### REFERENCE CONDITIONS

Air Intake Restriction... ......12 in.H<sub>2</sub>O (3 kPa) 

Rated speed and power

Gross power guaranteed within ±5% at SAE J1995 and ISO 3046 J1995 and ISO 3046 conditions:

77 °F (25 °C) air inlet temperature 29.31 in.Hg (99 kPa) barometric pressure 104 °F (40 °C) fuel inlet temperature 0.853 fuel specific gravity @ 60 °F (15.5 °C)

Ambient air temperature is defined to be the temperature of ambient air close to operating vessel that is not influenced in any manner by operating characteristics of the vessel (free field temp)

Conversion factors:

Power:  $kW = hp \times 0.746$ 

Fuel: 1 gal = 7.1 lb, 1 L = 0.85 kgTorque:  $N \cdot m = \text{lb-ft x } 1.356$ 

All values from currently available data. Subject to manufacturing and measurement variations and to change without notice

Actual performance is subject to application and operation conditions outside of John Deere control.

#### Notes:

M3: The M3 rating is for marine propulsion applications that typically operate between 2,000-4,000 hours per year and have load factors up to 50 percent. This rating is for applications that use full power for no more than 4 hours out of each 12 hours of operation. The remaining time of operation is at or below cruising speed.

Possible applications: Coastal fishing boats offshore crew boats, research boats. Short range ferryboats and dinner cruise boats.

Designed/Calibrated to meet:	Certified by:
------------------------------	---------------

- EPA Commercial Marine Tier 3
- · IMO MARPOL Annex VI Tier II Compliant
- · NRMM (97/68/EC), as amended
